# Outlook 2025 and Future

corporate branding  
and external appearance

# revision of our website

The screenshot shows the unyt.org blog homepage. At the top, there's a banner for "Announcing UIX 0.3" featuring a white keyhole icon and a city skyline icon. Below the banner, a post by Jonas Strehle is displayed: "Introducing magic with UIX 0.3" (Developer · October 15, 2024). The post includes a small image of a globe with a path from Mars to Earth. Another post by Benedikt Strehle is shown: "Client-Side Routing for Web Apps with UIX" (Developer · July 7, 2024). The UIX logo is visible at the bottom of the page.

The screenshot shows the unyt docs Documentation page. It features a header with the unyt logo and a navigation menu. The main section is titled "Documentation". It includes sections for "UIX" (with "Get started >" button), "DATEX" (with "Get started >" button), and "UIX Guide" (with "Get started >" button). Below these, there's a section titled "Some example projects" with three cards showing icons related to UIX, DATEX, and a shopping cart.

The screenshot shows the unyt.org overview page. It starts with a section titled "Übersicht" containing text about the platform's mission: "Wir sind unyt.org! Unsere Plattform ermöglicht sichere und private Kommunikation für alle." Below this is a large graphic of interconnected hexagonal nodes forming a network, with the letters "WWW" prominently displayed in red. The "Gegenwart" section discusses modern internet issues like data collection and manipulation. A "Spenden" (donate) button is visible at the bottom right.

# UIX: A Full Stack Web Dev Framework Leveraging Deno

Cousins Benedikt and Jonas Strehle are working on plans for a Supernet, a decentralized alternative to the internet. Here's how UIX fits in.
